PROFESSIONAL EXPERIENCE

Frontend Developer Intern (Int+ Technology)

May 2024 - August 2024

Waitr App

- Built the user-facing app for Waitr, focusing on seamless food ordering experiences.
- Designed and developed the landing page with a waitlist pop-up modal using Next.js.
- Captured user interest early, helping the product team gather valuable insights into customer demand pre-launch.

Traq PWA

- Developed the "Estimate Delivery" page, integrating API data to display available dispatch riders and price estimates based on the user's location and destination.
- Improved service transparency and speed of delivery estimates, enhancing the customer experience.

PROJECTS

Desserts Product Page [link](#)

- Developed a dessert ordering system using React, enabling users to independently add items to their cart and manage order quantities.
- Integrated dynamic cart management and real-time updates to enhance the user experience with responsive UI.
- Increased user satisfaction by providing a seamless ordering experience with real-time feedback and cart updates.

Github User Search [link](#)

- Integrated GitHub API to retrieve and display user information, including profiles and search results in real-time, improving search efficiency and user engagement.
- Implemented error handling and loading states for smoother user interactions, ensuring a polished and user-friendly interface.
- Increased user satisfaction by providing a seamless ordering experience with real-time feedback and cart updates.
